HONIBA S.A. (1984)

Honiba is a company devoted to the manufacture of the finest quality brass instruments, under the hallmark STOMVI.

VICENTE HONORATO IBÁÑEZ (1952) **PRESIDENT**

With only 28 he created his own company devoted to the fine jewellery manufactory. At 30 he began his new project: Brass instrument manufactory. He was inspired for many professionals that believed in his creative ideas.

At the age of only 28, Vicente Honorato created his own company devoted to the manufacture of fine jewellery. At age 30 he embarked on his new passion: the production of fine brass instruments. His creative approach was endorsed early on by leading brass practitioners.

The hand crafting of each of Vicente Honorato's STOMVI instruments benefits directly from Vicente Honorato's wealth of experience in jewellery smithing. This continues a rich historical tradition that harks back to the XVIth and XVIIth centuries in Nuremberg, when artisan jewellers and craftsmen turned their talents to the production of musical instruments in dedicated workshops

Vicente Honorato is known for his keen musical ear and perfect pitch, which combined with his craftsman's skills refined over long years impart in the instruments he creates a peerless tuning, without parallel.

In the sanctum of his Spanish factory in Xirivella, Valencia, there are received daily visits from leading brass musicians. It is their feedback, insight and experience that helps to shape the future generations of STOMVI instruments.

Idea, concept, evolution, design, technology,
materials and most important of all, craftsman's hands
are the secrets of the creation of
these unique instruments

Our objective is to construct unique
and personal instruments,
combining perfection in the design with the skill
of the master craftsman

In the Stomvi instruments we have the tools at our
disposal to cover a full range of acoustic response.
The broad range includes instruments
to satisfy each of the exacting requirements of students,
professionals and maestros
